MODEL HIPERBOLA
DAN
HARDENING SOIL MODEL

HUKUM KONSTITUTIF UNTUK APLIKASI PLAXIS

VOLUME 3

MODEL HIPERBOLA DAN HARDENING SOIL MODEL

Model Hiperbola (Duncan & Chang Model)	HK-03-1
1. Pendahuluan	HK-03-3
2. Pendekatan Hiperbola	HK-03-4
3. Model Hiperbola Duncan & Chang	HK-03-4
4. Variasi E_i dan $(\sigma_1 - \sigma_3)_{ult}$ terhadap Tegangan Keliling.....	HK-03-8
5. Modulus Tangential, E_t	HK-03-12
6. Pembuktian Rumus E_t	HK-03-13
7. Modulus Unloading Reloading, E_{ur}	HK-03-14
8. Perubahan Volume – Bulk Modulus	HK-03-14
9. Parameter Model Hiperbolik Duncan & Chang.....	HK-03-17
10. Keterbatasan Model Hiperbolik Duncan & Chang	HK-03-17
11. Parameter Tipikal Model Duncan & Chang.....	HK-03-18
Hardening Soil Model (dalam PLAXIS)	HK-03-19
1. Pembaruan dari Model Hiperbola	HK-03-19
2. Pembuktian E_i	HK-03-20
3. Parameter yang Diperlukan.....	HK-03-20
4. Modulus Kekakuan E_{50}^{ref}	HK-03-21
5. E_{50}^{ref} didapatkan dari uji Triaxial.....	HK-03-22
6. Contoh data E_{50}^{ref} dari uji Triaxial	HK-03-23
7. Perumusan E_{50} vs E_{50}^{ref}	HK-03-24
8. Pembuktian E_{50}	HK-03-24
9. Perumusan E_{ur} dan E_{ur}^{ref}	HK-03-25
10. Modulus Kekakuan E_{oed}^{ref}	HK-03-25
11. Contoh data E_{oed}^{ref} dari uji Oedometer	HK-03-26
12. Alternatif Modulus Kekakuan E_{oed}^{ref}	HK-03-27
13. K_o Tanah Normally Consolidated	HK-03-27
14. K_o Tanah Over Consolidated.....	HK-03-28
15. Over Consolidation Ratio.....	HK-03-28
16. Pre-Overburden Pressure.....	HK-03-29
17. Parameter Dilatasi.....	HK-03-29
18. State Parameter	HK-03-31
19. Analisa Kondisi Undrained.....	HK-03-32

20. Bidang Leleh dalam Hardening Soil ModelHK-03-32

- Lokus leleh geser (shear yield locus)
- Aturan alir (flow rule)
- Potensi plastis (plastic potential)
- Bidang leleh kap (cap yield surface)

21. Kelebihan dan Kekurangan Hardening Soil ModelHK-03-39

Daftar Pustaka.....HK-03-41
